

## Wiring Diagram

for  
1 Plugs per Cylinder using Single Fire Coils  
using  
Electronic Ignitions using 3 Ohm Coils

## SF Coils

Wiring for use with  
CDR, CDS & DS Ignitions  
used in single fire.

Do Not wire using points or ignition systems without saturation or dwell control.  
Over heating and Damage to Coil and/or Ignition will occur!!!

**Important Note: SF coils can not be wired for 2 plug per cylinder Single Fire.**  
(see DF 2 plug per cylinder single fire wiring)  
**Use only Carbon Core resistor Spark Plug wire!!**  
**Solid or Spiral wound wires will damage the ignition module or coil.**

Initial settings for spark plug gaps are:  
Stock Plug 0.028-0.032"
